PERSONAL PROJECTS

Full Stack website

- Created a full stack website with frontend uses React.js and for backend we have used node.js
- For storing data we have used Nosql mongoDb.
- we have learned about the security features and also how and when to use sessions and cookies.
- Github URL- <https://github.com/sachinverma2299/Mern-project-frontend>.
- <https://github.com/sachinverma2299/mern-project-backend>

E-Commerce site

- (Node.JS,Javascript,mongoose,CSS,HTML)
- This application is about an e-commerce in which you can add,edit or delete product as an admin user.
- As a normal user you can add a product to your cart and then can buy it.
- Uses Node.js for all the backend Api's and store and the user and product data in mongoDb using Mongoose.
- For the frontend we are using ejs template which is getting rendered After Api calls.
- We Have also added authentication and authorization in this application.
- GitHub URI - <https://github.com/sachinverma2299/E-commerce-website>

The Budget App

- (Javascript,Css,HTML)
- This application maintains the savings expenditure on monthly basis and maintain monthly budget.
- It also maintains the list of expenditure and source of income.
- Uses core Javascript and its functionalities and also work with DOM Manipulation in this project.
- GitHub URL-<https://github.com/sachinverma2299/The-budeget-App> .

WORK EXPERIENCE

Intern(Web development) TECHNOPHILE BUD

07/2021 - 08/2021

- Developed a landing page
- Developed a Survey form which is commonly used for getting feedbacks
- Developed a website using HTML,CSS,JQuery,Bootstrap
